TeleNet Media provides industry leading technology for your event!

How our Solution works

TeleNet Media has aligned itself with a leading satellite communications company to provide this cutting edge new distribution platform! The CDN is the leading provider of dedicated satellite communications for the Department of Homeland Security and numerous municipal emergency services. With that background and network you can be assured that signal reliability is an amazing 99% so whether it's a snowstorm or hurricane you can rely on TeleNet to distribute your content.

TeleNet Media Internet broadcasting uplink transmits at 1.3MB with a 6-Watt transmitter that is controlled from Master Control and onsite. Because we transmit via satellite we can broadcast from ANYWHERE in North America!

High Quality Event Production

Our video production crew sets the standard for online broadcasts. We maintain the highest quality production standards for your event.

Our Capabilities include:

- **Secure, dedicated satellite uplinking**
- **Easy to use, Pay Per View application**
- **Multi-Camera, all angle coverage of the event**
- **Custom branded internet video player**
- **Commercials or Ad banners inserted throughout the event, as you desire**
- **Graphics for the online event, including lower thirds and overlays for the event**
- **Viewer data and usage statistics provided at the end of the broadcast**
- **Onsite non-linear editing**
- **Post event editing and post production services to provide final DVD**
- **Professional Crew with decades of experience**
- **All equipment, cables and hardware**

- No Stuttering Video -

TeleNet provides the highest quality online broadcast of your event.

Action Sports

Perfectly suited for this industry, Internet broadcasting with TeleNet Media now allows action-sporting events to reach a broader audience that is traditionally more tech savvy and vastly sought after by advertisers. Additionally, internet broadcasting is a more cost effective way to distribute events because you don't have to deal with expensive, traditional television networks. TeleNet provides all the production and distribution necessary for your event.

Concerts

What's a better way to break onto the scene? Internet broadcasting with TeleNet Media! Record labels, music festivals and individual bands now have a cost effective, high quality method of showcasing talent by broadcasting concerts and events live to the world in high quality! You can offer the event(s) for free or as secure pay-per-view events.

Traditional Sports

With so many sporting events cramming onto television networks and paying a premium for limited satellite time and air space now there is a better way to reach larger audiences. The solution? Internet broadcasting with TeleNet Media! Broadcast LIVE in high quality! You can offer the event(s) for free or as secure pay-per-view events.

Corporate Events/Announcements

Companies can now reach their employees with announcements, special events and training without ever leaving the city or office! With Internet broadcasting by TeleNet Media, companies can now broadcast directly to their employees with a secure, high quality video player that only company employees can log into and view. They simply log onto the video portal at the office or home and view the event as it happens!

Religious Events

Religious organizations can now reach a larger flock and not purchase expensive television airtime. With internet broadcasting by TeleNet Media your message can now be viewed at home or the office. This no longer limits the people you reach by the size of your congregation; it empowers you to speak the word.

News Live Shots

With the addition of a *Streambox* at the television outlet, television news outlets can now use TeleNet Media to provide satellite uplink at the data rate of your choice (up to 1.3Mb). This saves news stations from the costly overhead of traditional satellite uplink trucks, satellite time and with a reliability of 99% you can be sure that even in a hurricane your shot will make it on the air!
